

Assignment3_BonusPoint

In assignment3_BonusPoint, I change *parameters* and add the *data-enhancement* like assignment2, I also use *learning rate decay* to increase the performance in test data.

The below table shows the parameters I used:

F	5	Nf	60
Nh	400	Eta_min	1e-5
Eta_max	5e-2	N_batch	50
Epoch	75	Lam	0.001
N_s	800	Accuracy	71.02%

The running time is 1:33:15

The charts shows the train loss and validation loss
